

Are you awesome?
we're hiring.

📍 Western Cape

Role Purpose: Provide asset management services to clients as part of a multidisciplinary team relating primarily to infrastructure and associated assets.

Key Performance Areas

- Plan, provide management oversight, assemble, capture, provide quality assurance, clean, and interpret infrastructure asset and buildings data.
- Prepare and optimise infrastructure life cycle plans.
- Prepare strategic and tactical asset management plans for infrastructure and building portfolios.
- Conduct management practice assessments and prepare prioritised improvement plans, integrating with appropriate technology and systems development opportunities.
- Assist to prepare capital and maintenance management improvement strategies and plans.
- Conduct portfolio, programme and project management practice assessments and improvement plans.
- Develop competency frameworks and improvement plans.
- Prepare organisational reform, change management plans, and oversee implementation.
- Initiate client participation around deliverables to ensure visibility on how deliverables fit into Asset Management Framework.

Qualification & Registration

- B Tech /B Degree in Civil/Electrical/Industrial/Building Sciences/Mechanical Engineering or the equivalent.

Experience and other requirements

- 3 years' post-registration experience in a similar or related role.
- Professional registration (Pr Eng or Pr Tech) will be an advantage.
- A recognised professional project management certification will be an advantage.
- Interest in and / or exposure to public infrastructure management.
- Valid driver's license and access to a vehicle.
- We offer a hybrid work environment; you will be required to attend on-site meeting and workshops at the office or at the client sites.
- Occasional short-duration over-night travel, and some field work will be required.
- Extended working hours apply when project deadlines dictate.
